

About Testree

Testree is the independent verification and validation division of Nous Infosystems. Testree offers its Testing services in SOA, Mobility, Security, and Datacenter across BFSI, Healthcare, Telecom, Retail, E-Learning, Energy and Utilities domains.

Testree's testing services and solutions include Functionality, Usability, Performance, Reliability, Supportability (Installation and Compatibility Testing), and Scalability (FURPS+). Testree uses proprietary frameworks as well as industry standard tools to provide innovative testing solutions to various applications built using emerging technologies.

Testree recognizes the importance of strong partnerships with organizations to gain the competitive advantage to provide customers the best-of-the-breed testing solutions. Testree leverages its partnership with different tool vendors to provide comprehensive test solutions.

About Nous Infosystems

Nous Infosystems (CMMi Level 5) is a global quality IT solutions provider. By combining core capabilities in developing product frameworks & solutions with unmatched expertise in technology skills and domain knowledge, Nous drives successful initiatives for onsite and offshore partnerships.

Technology & Business Groups

Enabling companies leverage IT for business value is our business call. We help customers unlock valuable information resources, improve production efficiencies, and build strong customer relationships, by working through the major 'Technology & Business Divisions' within Nous: [Software Services](#) | [EAS](#) | [Testree \(Independent Verification & Validation Testing Services\)](#) | [vServe 24/7 \(Remote Services Division\)](#)

Industry Expertise

- Compatibility Testing
- Performance Testing
- Platform Testing
- Integration Testing
- Open Source Systems Group

Testree Focus Areas

- SOA Testing
- Security Testing
- Mobility
- Data Center Testing
- Test Coverage Audit

Key Business Benefits

Acting as a strategic guide to our customers, we;

- Shrink costs by about 40 per cent or more
- Deliver on time, and on budget
- Minimize risks, and improve productivity
- Reduce the complexity of your IS
- Provide improved computing performance, scalability, reliability and security
- Build easy-to-manage infrastructure & applications at the lowest possible costs
- Develop solutions that enable more efficient resource allocation, information-sharing & real-time availability of data

Key Strengths

Testree believes in achieving 'First-Time-Right' Solutions. We have expertise in performing security / penetration testing on the web applications. It follows the industry standard guidelines by Open Web Application Security Project (OWASP) and Web Application Security Consortium. Agility, security, high availability of Data Centers are few of our key strength. We ensure robust, scalable, secure, and interoperable SOA. Testree's Deliver systems is more flexible at a low Total Cost of Ownership (TCO) to achieve reduced capital expenditure (CAPEX) and operating expenditure (OPEX).
